Welcome to the 2011 Fall Semester! Members of the Library staff have been spending the summer preparing for Fall Semester as well as beginning the transition of library activities for our new building. Among many new technologies we are expecting in our new facility, the Library will be implementing a Radio Frequency Identification (RFID) technology to automate our circulation and management of library materials. Our goal in this innovative initiative is to enhance the library experiences of the increasing number of our students and community users by providing a self-checkout system that will allow for stacks of items to be checked out simultaneously, as well as providing faster and more efficient searching for holds, lost items, unresolved security issues, and for conducting proper and regular shelf management. In order to convert our library to an RFID system, all library materials must be tagged and programmed, and in 2012 our new Self-Checks will read the information on the RFID tags and bar code on library cards, allowing card holders to check out their own materials more quickly and easily. The library staff members started this intensive project this summer, and our goal is to RFID tag 100% of our circulating collection by the end of Spring semester, and to install most of the new staff workstations and self-checks in the new building. So far all LW Library materials (about 32,000 items) have been successfully tagged and conversion of NH materials is in progress.

Also, in preparation for the move in 2012, the library has begun evaluating and streamlining its reserves collection. This is being done to ensure that students have access to the most useful, timely, and relevant course materials possible. At the conclusion of the Spring 2012 semester, the library will migrate to a new single-campus database. During this migration, the entire reserve database will be taken down, and a new one built. This new database will be set up to best facilitate student, faculty, and staff searches for relevant course materials.

-Dr. Clara A. Ogbaa, Director of Library Services

New This Fall!

The library has recently acquired some exciting new resources which will enhance services to students, faculty and staff. They include a streaming video database, iPads and e-Readers, an upgrade to the electronic subject/course guides subscription, and a mobile web page.

Films on Demand: This database subscription features a comprehensive collection of over 7,000 educational videos in subjects across the curriculum and provides faculty the ability to embed links to videos in Blackboard. To access this database on-campus go to the library's homepage and click on “Articles/Databases”, or off-campus log into MyCommnet and click the Library tab.

iPads & e-Readers: The library has recently acquired five iPads in addition to the Kindle and Nook e-Readers. These devices come preloaded with many ebook titles in various genres and are available for loan to students, faculty and staff.

Libguides: These electronic research guides, created by Gateway librarians, have been upgraded to Campus-Guides for increased functionality and features such as browsing by group or subject. Faculty, to request a guide for your course, go to the library's homepage and click on Library Forms in the left-hand column.

Mobile Web Page: You can now use your smartphone to check the library’s hours or directions, look up items in the catalog, use our ASK a question service, or search a library database. Click on the Mobile Web Page link from the library’s homepage to access.
Abraham Verghese’s *Cutting for Stone* hooks the reader with its first sentence. This multi-layered novel of family and medicine dissolves ethnicity in a setting of political extremism and poverty. In an Ethiopian mission, conjoined twins are born to a nun who dies in childbirth and a British surgeon who separates his sons then disappears. Out of the turbulence, two Indian doctors and the boys spontaneously form a family, which Verghese portrays as both quirky and loving. The brothers, although genetically identical, have different characters and temperaments. Their love and lust for the beautiful Genet, causes a breach when one brother betrays the other. In a rich, picturesque prose, Marion, the brother who emulates his missing father by becoming a skilled surgeon, narrates the story and captures the love and loyalty among the small community within the mission hospital. His brother, Shiva, also practices medicine specializing in women maimed during childbirth. During one period of political upheaval, Marion flees from Ethiopia with the help of revolutionary guerillas, including Genet. Arriving in New York, a low-income New York hospital immediately hires him, and eventually he encounters his lost father, a renowned surgeon, who gradually becomes his mentor. In the end, he must trust both his father and estranged brother to save him. This book is a must-read for those who like a novel that keeps readers involved and makes them reluctant to let go when it ends.

—Virginia Woolums, Professor of English

**LibQual Library Survey**

The *LibQual* Library Survey was sent out in May to a sample population of Gateway faculty, staff, and students. Survey questions concerned the ease or difficulty accessing tools and information, physical space and environment, helpfulness and competency of staff, and included space for personal remarks.

The Library received 315 valid responses to the survey, and 136 participants provided additional comments. Services offered by the staff registered the highest scores, accompanied by a large number of positive comments about the Libraries’ performance as a whole.

The Libraries’ space that inspires study and learning and modern equipment that lets individuals access needed information did not fare as well, with many participants expressing a desire for additional resources. Participants also indicated a strong need for more attractive surroundings in the Library, more space conducive to quiet individual study, and more computer and technology equipment.

Raffle prizes were awarded to six lucky people for their participation in the survey.

1st prize: Brian Cherrington - Apple iPod Touch
2nd prize: Rachel Williams - Sony eReader
3rd prize: Yair Arbeli - Sony eReader
4th prize: Mark Lynch - Sony eReader
5th prize: Rosemary Lovallo - Kingston USB drive
6th prize: Megan Christopher - Kingston USB drive

Increase in Library Services and Resources for FY2011

Last year proved to be another very busy year in the library as the statistics below indicate. Here is a sampling of services and resources utilized by the college community in the previous fiscal year. To view additional library statistics go to the library's homepage and click on Annual Report.

- **Over 300,000 visitors to the library**
- **257,668 hits to the library homepage**
- **Over 135,000 database searches executed**
- **16,384 items lent out**
- **5,311 reference questions answered**
- **4,640 hours open for business**
- **3,176 ebook titles added to the collection**
- **2,124 print titles added to the collection**
- **1,299 interlibrary loans processed**
- **153 information literacy classes taught**

Library Staff Professional Development

Dr. Clara Ogbaa, Director of Gateway's Library, and three faculty members, Carol Brutza, Jonah Cohen, and Martha Hayes, attended the Kroc Faculty Institute's "Teaching Peace in the 21st Century" on June 19-23, 2011 at the University of Notre Dame. Kroc Institute is the leading center for the interdisciplinary study of the causes of violent conflict and strategies for a sustainable peace. This intense program focused on the special challenge of teaching and learning Peace Studies in order to develop a stellar program at institutions as well as the role of the library in Peace Studies Program Development. Attendees were educators and administrators from seventeen colleges and universities in the U.S. and abroad.

Funds were provided through the Professional Development Grants from the Gateway Foundation.

Shauna Carrano, Jianxin Yang and Martha Lipowski attended a symposium at Yale University, *Changes and Tensions in Teaching and Technology*, on June 9, 2011.

Jianxin Yang and Dr. Clara Ogbaa attended the annual Association of College and Research Libraries Conference in Philadelphia, April 1-April 2, 2011.

Staff Happenings

Danielle Harris-Martin and husband Leo welcomed their first child, Leah Nicole, born on Mother’s Day, May 8, 2011. Danielle, a student worker in the library, is majoring in General Studies and her husband Leo is also a Gateway student.

Michele Cone, former Gateway Library Director for almost 30 years, welcomed the birth of her first grandchild on Aug. 2, 2011. Eleanor Cassandra, daughter of Jenny and Bill Ruth, weighed 9lbs. 10oz and was 21” long.

Both babies and parents are doing great. Congratulations from the Gateway community!
Student Focus

This semester’s Student Focus is on Mario Fasano. Born and raised in New Haven but currently residing in Wallingford, Mario is dedicated to achieving his educational goals and helping others who are trying to do the same. Walking the halls of the Long Wharf campus you’re sure to run into him and likely to be greeted with a hug or a handshake. His mantra, “Giving is better than receiving,” is something he does not take lightly and practices on a daily basis. Even with his busy schedule, Mario is always ready and willing to mentor other students who are struggling, sharing with them the challenges he faced in his life.

Mario became a father twice while in high school but still managed to graduate from Notre Dame with a sports scholarship to Yale. He ended up postponing college to help run his father’s grocery store and spent the last 33 years as owner and operator of five businesses. He openly admits he made some very bad decisions in the past, resulting in serious consequences. His epiphany came one day when sitting at home and out of work because of a disability. That day he decided to go back to school and reignite his passion for learning, after 30 years.

When Mario started at Gateway in Summer 2010 he had never used a computer. There were times that tested his commitment and fortitude, but he persevered. In his second semester he made the Dean’s list and has earned a 3.71 GPA. He’s currently working on two majors – DARC and Liberal Arts and Sciences - and hopes to graduate by Fall 2012. His plans are to transfer to SCSU or UCONN after graduating, and he hopes to someday take a class at Yale. Mario is a student worker in the Counseling Office, a volunteer tutor for Math and English, a student mentor for NSAR, and also plans on becoming more involved in Student Government in the Fall.

Mario has four children whom he is proud to say have all graduated from college, and three grandchildren. He credits his faith with getting him back on the right path and helping him through the rough patches. In hindsight, he admits he would have made some better choices but says it’s made him who he is today. His advice to others who may have reservations about starting or returning to school; “There’s no reason anyone coming into this setting can’t succeed. If I can do it, anybody can do it” Words of wisdom from someone who’s been there. Mario can be reached at 203-214-1246.
