A+ CERTIFICATION - REMOTE (RLON)

A+ Certification is achieved through a two-part testing program sponsored by CompTIA that certifies the competency of entry-level service technicians in the computer industry. This is an internationally recognized credential backed by major computer hardware and software vendors, distributors, resellers and publications. This 80 hour class is taught via a remote modality by CompTIA certified instructors.

Earning A+ Certification means that the individual possesses the knowledge and skills essential for a successful entry-level computer service technician, as defined by experts from companies across the industry. In addition, A+ Certification is required in many Help Desk and Networking positions. The updated curriculum is based on two tests. However, both include hardware and operating systems concepts, along with additional topics such as security, safety and environment issues, communication and professionalism. Students can enroll in A+ Computer Technician training, without any experience in the field. However, it is recommended that students are familiar with basic computer operation and navigation of an operating system such as Windows.
